

Stiven Roytman

Degree: Bachelor's in psychology, 2021, concentrations in neuroscience and philosophy.

Affiliation: Wayne State University , 2021.

UoM: Currently pursuing a Master's in Applied Data Science.

Research:

Currently, working at **UofM** Functional Neuroimaging, Cognitive, and Mobility Lab, where he is helping advance our understanding of neural mechanisms of Parkinson's disease. By combining his understanding of the brain across multiple scales with latest advancements in statistics and machine learning, he hopes to accelerate the pace of scientific discovery in the Parkinson's disease field, with the goal of bringing us closer to developing novel treatments and therapies.
